Directions: Add the above in as a table with 1 row and 3 columns. Bgcolor of table is FF99FF. Table border= "0" Cell spacing= "40" .

WELCOME

(3)

Directions: Add this in as heading 1

(5)

(4)

Directions: The font below will already be formatted because of the directions you set up in your CSS which was placed in the <header>. The table width = 1000

The Internet is a constantly changing tool which provides students with the world at their fingertips. Ten years ago, most people could not even imagine the impact that technology would have on our society and the world as a whole. The rapid growth of technology is changing the way we communicate our thoughts and ideas in the classroom and beyond. It is my desire and I feel that it is my responsibility to help students and teachers understand how technology can be used as a tool to enhance learning in the classroom and student's experience in the work force. The boundaries for technology are continuously expanding within the Natick Public School system and many schools through out the country. Students are becoming computer literate and proficient at very young ages. With the focus today on tech-nology advancement in our society and world, early computer proficiency is a ne-cessity for our students. In my classes I will challenge my student's basic knowl-edge of computer systems and bring their skills to the next level. Please use this website as a guide and tool to follow the curriculum being covered in Intro to Web design and Internet Management. Students please visit this site frequently to check -in on classroom and homework projects. All timelines and rubrics will be posted to this site. This site will be updated weekly and I encourage you to share it with your parents, family members, peers and classmates. Use your time on this site and in my classroom as an opportunity to LEARN, GROW, EXPLORE and SHARE.

HTML FOR CSS

This will format all the pages connected to this page. We will be setting up defaults for the background color, font type, size and color, margin…

<html>
<header>

<title>Quiz Page</title> **the title of the web page on the browser tab will be "Quiz Page"**

<style type="text/css"> **starting here is CSS information**
body   **All the information below pertains to what can be seen in the body**
{
font-size: 75%;   **text size will be 75%**
font-family:"arial";   **text type will be arial**
background-color: #DCDCDC;   **the background color of page will be gray**
Color: #8A2BE2;   **the font color will be purple**
Margin:10px;   **the margin on the page will be 10px**
}
h1 {font-size:200%;}   **any text coded as heading 1 will be font size 200%**
h2 {font-size:140%;}   **any text coded as heading 2 will be font size 140%**
h3 {font-size:110%;}   **any text coded as heading 3 will be font size 110%**

th {background-color:#DCDCDC;}   **table bground color will be gray (same as page bground color)**

a:link{color:#8A2BE2;text-decoration:none;}   **all links will be purple with no other formatting**
a:hover{color:red;font-weight:bold;text-decoration:none;}   **when you roll over a link the text will turn red, bold and no underline (additional decorations)**
a:visited{text-decoration:none;}   **once a link has been clicked on the appearance of the link will not change**

</style>   **All information on CSS will end here**
</header>   **End of header**
