About

The purpose of this course is to prepare you for a future where you can properly harness advance web design skills. The course covers advance Hypertext Markup Language (HTML) and CSS Style Sheets, as well as advance topics in Dreamweaver and Photoshop as it pertains to Web Design. It will also introduce students to the Adobe Flash program which is a program that will allow them to incorporate animated .swf files into their web sites. Students will do text and classroom work in addition to peer group activities and independent projects. Students will create 3 Websites each serving a different purpose and audience. Many professions value an employee who is proficient and advance in HTML, Adobe Dreamweaver and Flash. This class will provide you with the skills necessary to use these technologies in such a way that you would be confident in adding them to your resume.

Natick High Web Design

HOME RESOURCES STUDENTS LESSONS

Welcome

The purpose of Advanced Web Design 1 is to begin to prepare students to work in the professional field of Web Design. Students acquire new Photoshop tools and enhanced their knowledge of HTML and CSS by learning advanced Dreamweaver.

Anyone looking to pursue a career in Web Design and development needs to know how to use Adobe applications such as Dreamweaver and Photoshop because they are the industry standard.

In this class students will create a Photoshop portfolio displaying a variety of advanced skills. Additionally, they will be assigned the task of creating a class website, which will house resources, tutorials, and other information that can be useful while designing.

About The Class

Welcome to the class site for advanced web design, fall of 2013. The purpose of this site is to act as a base site for all the advanced web design students in the semester 1 class. Different pages on this site include important resources that students can use in order to succeed in this class. The lesson and resources sections are frequently used by the advanced web design students on a daily basis.

The curriculum that the students learn in advanced website design includes different adobe applications such as photoshop, dreamweaver, and other applications that are used along the way. Once the students learn how to use photoshop fluently they then can use photoshop and dream weaver together. Not only is this class very informative but web design is a job that is constantly growing and the need for web design in the world becomes larger and larger. By having this skill the students are able to apply the skills they learn in the real world. Most of the students in advance one plan on pursuing web design and moving on to the advanced two class. Overall, the advanced web design class is extremely informative and enjoyable and this website is the ticket to success for the advanced one students.

*Web Design
Natick Fall 2013*

[About](#) [Students](#) [Lessons](#) [Resources](#)

About the Class

Natick High School has developed well when it comes to new technology brought into the learning process. Students have been given mackbook pros, and new classes have been created by using this technology. One of the most successful classes so far is Web Design, taught by Mrs. Cullen. Web Design Classes teach students how to use code, such as HTML and CSS. Students take the time to really learn how to use photoshop to edit photos, as well as make entire websites using Dreamweaver. The class this site is for is Advanced Web Design level 1, which focuses on more advanced aspects of the applications used in all Web Design classes. This fall semester of 2013-2014, students have already done a photoshop project. The project was called photoshop ping pong, where every student was given a set of three pictures to use and edit using photoshop CS6. Now students are working on the flyer and the Bringing it all together project. The flyer was aimed towards using photoshop to create a good flyer to announce an arts even in Natick this March. The Bringing it All Together project is a project where the students used their new skills to create a class home page for the class website. This site was made for this assignment. Overall, the class is great and unique from other schools, as students take great pride in their work. The class teaches students new skills that they will likely be able to use later in life.
