Start Building!

Provided below is a helpful timeline in helping you to start building your first professional site in Adv. II Web Design

1. Project Management

2. Set up folder structure on your local computer (root folde- images, css and sources folder)

3. Set up in Site in Dreamweaver (Mrs. Cullen will provide the FTP information to you at a later time, just set up the local side.)

4. Create homestyle.css

5. Create index.html which links to the homestyle.css

6. Create sidepages.css

7. Create a draft.html which links to sidepages.css (which will saved out again as template for side pages)

8. Create "Side Pages Template" from draft.html

9. Create first side page from the "Side Pages Template"

10. Continue to create the rest of your pages from the template page.
