Codecadmey, Intro. to CSS Basics Assignment

## Directions

When you arrive at codecademy.com you do not have to create an account but I suggest you do make an account if you want your work to be saved and be able to finish any sections at home.
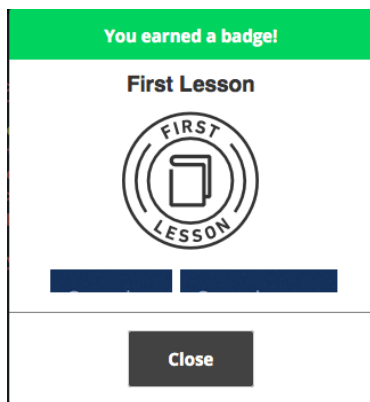

1. Go to, http://www.codecademy.com/ and scroll to the bottom of the page and under **Learn to Code** click on **HTML & CSS**

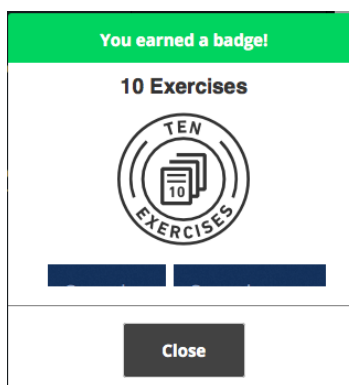

On the following page scroll down and click on CSS: An Overview

2. Follow the lessons step by step. There are 26 lessons in this chapter. For each lesson read the content on the left side and apply the directions on the right side where the text editor is located.

3. If you follow the directions above you will receive four badges throughout the lessons and a completion notice at the end.

4. Submit: In a Google Doc place a screen shot of **your four earned badges (you must take the screen shot of the badges when they pop up! You may not return to them after)** and a screen shot of the completion screen with your name in the code for the link. Examples of the screen shots are below. *If for some reason if you do not receive the badges continue on and at least provide a screen shot of the final screen.

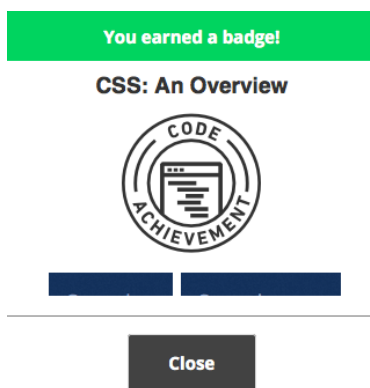

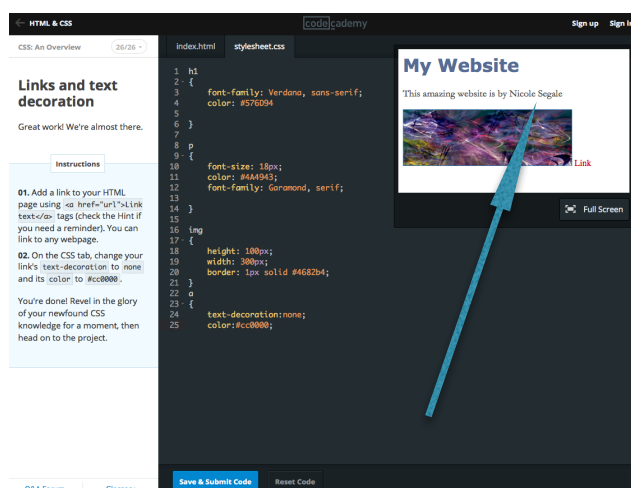

Badge #1

Badge #2

Badge #3

Badge #4

Final Screen with Name in Code
