

Creating an Attractive Magazine Presentation Homework

Directions: Using the notes you took in class today and the Design Handbook, Color Association Link, Trends and Photography composition presentation as a resource create a Google presentation which showcases your knowledge of the following...

- **Design principles** (1 slide for each): repetition, contrast, alignment, proximity
- **Color Association:** Choose 2 association and create 1 slide on each
- **Trends:** Choose 3 trends and create 1 slide on each
- **Photography composition:** Choose 3 photography composition rules and create 1 slide on each

The presentation must also include a title slide and a slide with citation of images. Each slide must include a minimum of 4 concepts to focus on with each principle and 1 image.

Alignment

Alignment - items on the page are lined up with each other. You can align items on the left side, right side or centered. The rule is choose one!

- DO place objects on a page with a reason
- DO line up text and graphics with horizontal and vertical alignment
- DO create unity with strong flush left or right
- DO create a cohesive unit
- DO NOT mix alignments
- DO NOT line up text to the edge of the left edge
- DO NOT indent text on a new paragraph
- DO NOT center align objects unless you have a reason.
