What To Do While Out

iPad Publishing
Tuesday, September 11, 2012

* *Keep in mind as I told you last week the Tech department and myself can see the activity on your computer at any time. You should stay focused on the task at hand because you never know if anyone of us is watching you!*

1. Work with your group to finish your presentation on the History of Desktop Publishing (this should only be for about 10 minutes- you should have finished this for homework.) We will present the pages upon my return on Thursday.

2. Read through the "Design Principles" presentation which is located on my site "In the Classroom.") The presentation has four sections plus a quiz! Read through the four sections and then take the quiz. At the end of the quiz take a screen shot of your score.

   *Tip: To take a screen shot = command + shift + 3 or command + shift + 4

   Insert the image (screen shot) of your score into a Google Doc and share the Google Doc with lcullen@natickps.org using the format shown on the white board in class.

3. If you finish the Design Principles presentation and quiz continue on to read through the Trends and Photography Composition presentations (there is not a quiz with either document.) Upon my return I will review these presentations and ask you to share notes on them so if you want you can get a head start on your notes.

* If you are not comfortable with computers and need help feel free to ask the sub or another student.

* Visual of directions provided on the next page
