

What To Do While Out

Introduction to Web Design

Friday, October 23, 2013

** Keep in mind as I told you before the Tech department and myself can see the activity on your computer at any time if you give us a reason to do so. You should stay focused on the task at hand because you never know if anyone of us is watching you!*

1. Complete the Introduction to HTML worksheet which is linked in the classroom (see visual below.) When you click on this link be sure to “make a copy” of the file before typing in your content. Also, you must do this work individually- don’t try to cheat the system! You have plenty of time to complete this worksheet. The document must be shared with lcullen@natickps.org by the end of the period for full credit. More specific directions are provided at the top of the linked document.
2. Submit the bi-weekly blog
3. If you complete the worksheet early work on either practice .html files to add your own content and .html

The screenshot shows a website interface with a search bar at the top left. The main heading is "In The Classroom" in red. Below it are navigation tabs: "Web Design", "Adv. Web Design I", "Adv. Web Design II", "iPad Pub.", "PLC", and "Prof. Training". The "Adv. Web Design I" tab is selected. Below the tabs, there are two lines of text: "* Still Available: In the Classroom Files, Spring 2013" and "* Course Units: Using Standard District Template". A table displays course content with two columns: dates and descriptions. Two blue arrows point to specific links in the table: one points to "Introduction to HTML worksheet (use w3schools.com as a reference)" and the other points to "Submit bi-weekly blog".

Web Design	Adv. Web Design I	Adv. Web Design II	iPad Pub.	PLC	Prof. Training
* Still Available: In the Classroom Files, Spring 2013					
* Course Units: Using Standard District Template
